

NEW 16K MEMORY FEATURE

(UPDATE TO ATARI 800™ OPERATOR'S MANUAL)

This version of the ATARI 800™ Personal Computer System contains an additional 8K of RAM in the form of a single 16K Memory Module. This 16K memory feature allows 16,384 bytes of user programmable memory, providing you the capacity to write and use longer more sophisticated programs. Additional 8K and 16K RAM Modules (CX852 and CX853) are available from your ATARI dealer allowing you still further memory expansion up to a full 48K.

These new systems no longer include the ATARI 410™ Program Recorder or the Atari Educational System Master Cartridge. Your new ATARI 800 System includes:

- Computer Console
 - 10K ROM Operating System
 - 16K RAM
- TV Switch Box
- AC Power Adapter
- 2 Instruction Books
 - Operators Manual
 - ATARI BASIC
- 1 Cartridge
 - ATARI BASIC Computing Language

NOTE: Upon receipt of your ATARI 800 System verify that the 10K ROM and the 16K RAM modules are firmly secured in their appropriate slots.

The ATARI 410™ Program Recorder and the Educational System Master Cartridge may be purchased from your ATARI dealer along with all of the current optional peripherals and preprogrammed software.
